Output Jack Pickup Style Manual

INSTALLATION

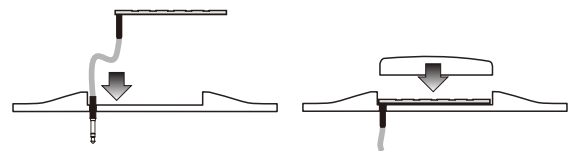

Step 1: Make a hole at the tail of the guitar with 12mm drill, then fit the output jack in.

Step 2: Drill 3mm hole for pickup wire at either end of slot.

Step 3: Insert pickup into slot so that when laid flat, the opposite end of pickup lies against slot edge.

Step 4: Place the battery bag with 9V battery in, tie up the spare cable then stick at the back inside of the guitar
